

CAFÉ DU PARC

SIPS

At Café du Parc, we like
giving familiar ingredients
a change of scenery.

What if Coco Pops found their way into a whiskey cocktail, or Champagne came by the scoop?

We put the work into
making the flavours get
along, so you can focus
on the catch-up.

Take your time
choosing. We're here if
you'd like a steer.

kombucha

Kombucha is a naturally fermented tea made using a living culture of bacteria and yeast. The process creates its signature tang, gentle fizz and naturally occurring live cultures, making it a refreshing alternative to the usual soft drink.

The kombucha we serve comes from All About, founded in Galway by best friends Emmett and Keith. What started in a garden shed has grown into Ireland's only carbon-neutral kombucha brewery, where their raw, unpasteurised brews are made with real, organic ingredients. Good ingredients, good energy and plenty of fizz.
